# Some Gratitude for our Irish hosts... and Setting the Scene

*“to learn one must be humble....”*

- James Joyce (Ulysses)

The best way to understand an organization is by trying to change it –  
Kurt Lewin ->

The best way to understand an organization is by trying to **help those  
who work within it to** change it

## Some guiding questions...

- (1) What are the optimal strategies for **communicating and disseminating equity-oriented research findings and recommendations** with and for diverse stakeholders?
- (2) What structures and strategies can policymakers, higher education leaders, school system leaders, and improvement researchers employ to **facilitate equity-oriented improvement research and continuous improvement utilization**?

# Act 1: The Context

- The New York Context and The Equity Imperative In New York State Schools

# New York State Context: A Snapshot

## Unpacking Equity

(an overused and annoyance-provoking term for many educators in NYS)

*“Equity continues to be defined in a variety of ways and the goals and character of equity-oriented improvement efforts are impacted by how equity is defined.”*

Wilcox, K. C., & Lawson, H. A. (2022). Advancing Educational Equity Research, Policy, and Practice. *Education Sciences*, p. 13

Equity vs. Equality:  
2 Frames  
& Improvement  
Science as one  
approach to  
addressing issues  
of equity

Equity emphasizes **special policies, customized practices and non-discriminatory, personalized treatment**

Equality emphasizes **“sameness” achieved by standardization**

# What we already have

...

Research on ...

- ✓ contexts where outcome disparities are being addressed successfully.
- ✓ interventions that work well in different contexts.

National and state policies directing educators to ...

- ✓ use research and data to improve student outcomes.
- ✓ use continuous improvement approaches within and across schools.

# What we don't have enough of...

- ✓ Research designed to provide clear implications for practice and have “baked in” strategies for use of research findings for a variety of stakeholders that might benefit from them.
- ✓ District and school leaders and frontline educators who have time and/or know how to take advantage of research and data collected in their own settings to engage in continuously improving their systems.
- ✓ A continuous improvement “infrastructure” (structures and routines) that encourage the use of research and local data to make systemic and strategic changes in and across schools.

## Act 2: A Backbone Organization

An Example of a Backbone\* Organization for school improvement: NYKids

*\*Backbone organizations serve as coordinating bodies that bring together a diversity of stakeholders and lead synchronized efforts to achieve common goals.*

## Engagement and Continuous School Improvement in the New School Year: NYKids and Oppenheim-Ephratah St. Johnsville's COMPASS Institute Highlights

Jessie Tobin, Kristen C. Wilcox & Meg Rooney

### What Do We Know About Engagement?

"A priority was [to] build relationships built on mutual respect and transparency and know where people coming from . . . [to] make ourselves accessible to parents, to comfort them or reassure them, answer questions. It's something that we definitely prioritize and have to continue prioritizing."

Educator, NYKids study

Attention to the connections between engagement and interpersonal relationships has increased since the COVID-19 pandemic. The term "engagement" can be applied toward students, educators, and parents and caregivers, and it takes on several different forms in schools.

Student engagement refers to the energy, interests, and emotional experiences of youth participating in educational activities and the "policies and practices" within schools which invite cognitive and motivational involvement from learners.

As educators promote engagement among learners in and outside the classroom, they often collaborate with one another in professional

# School Improvement in P-12 Schools: Voices from the Front Lines

- *This is hard stuff, but attainable with a group I am excited to be involved from its infancy and looking forward”*
- *“Takes a “village” to get our goals to be successful”*
- *“In order to show that things are improving you must have an action plan that must be measurable”*
- *“We need to share/communicate our goal with all staff”*
- *“I feel excited and empowered to make our building a better place for all”*
- *“This work will be impactful with lots of moving parts, but we are on the same page that change is needed and welcomed”*
- *“I am not alone in my thinking others have the same ideas and needs”*

# Act 3: Lessons Learned

What we need  
more of...

- ✓ Research designed with practical use value in at the center
- ✓ Guidance for those who facilitate and participate in continuous improvement initiatives to effectively develop school and district improvement infrastructures
- ✓ Alignment between accountability, improvement, and research infrastructures

What are the optimal strategies for **communicating and disseminating equity-oriented research findings and recommendations** with and for diverse stakeholders?

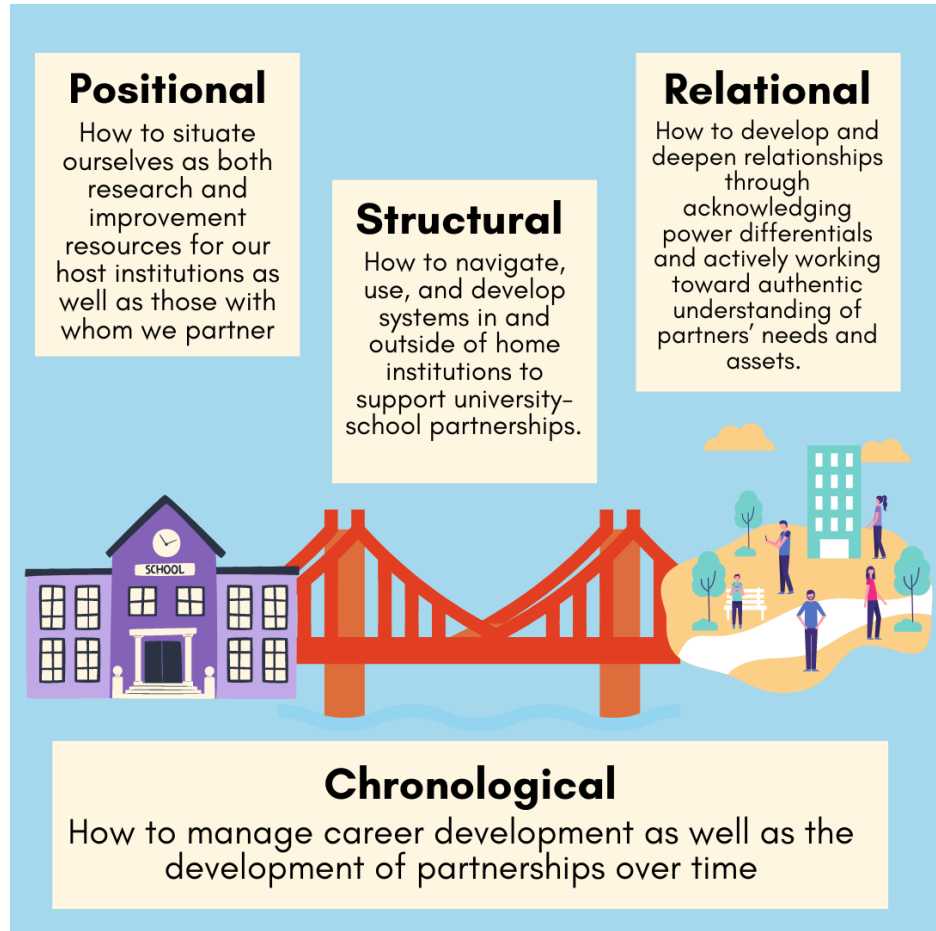

- 1) **direct engagement with a diverse array of stakeholder groups** representing large numbers of members through presentation and publications in member communications;
- 2) **direct engagement with state education department agents** in the role of “thought partner” as well as co-designer of continuous improvement professional development opportunities.

What **structures and strategies** can policymakers, higher education leaders, school system leaders, and improvement researchers employ to facilitate equity-oriented improvement research and continuous improvement utilization?

- 1) **surfacing a theory of improvement through dialogue** with multiple policy agents to encourage sense-making and build coherence across entities and organizations with regard to improvement initiatives,
- 2) thoughtful **integration of practice-oriented expertise with improvement research knowledge and school improvement expertise** in the development and delivery of continuous improvement-focused professional development, and
- 3) building improvement infrastructure from an **equity-center** (i.e. how will the research and practical change address systemic issues that limit access to quality education and marginalize youth and their families)

Challenges,  
Opportunities, and  
What's on The  
Horizon for  
Backbone  
Organizations in  
IHEs

**Positional**  
How to situate ourselves as both research and improvement resources for our host institutions as well as those with whom we partner

**Structural**  
How to navigate, use, and develop systems in and outside of home institutions to support university-school partnerships.

**Relational**  
How to develop and deepen relationships through acknowledging power differentials and actively working toward authentic understanding of partners' needs and assets.

**Chronological**  
How to manage career development as well as the development of partnerships over time

CHAPTER 20

**A TALE OF TWO  
UNIVERSITY-SCHOOL  
IMPROVEMENT HUBS**

**An Ecological View of Hub and  
Hub Leader Development**
